

Precision Mounting Technologies
Installation Instructions
for:

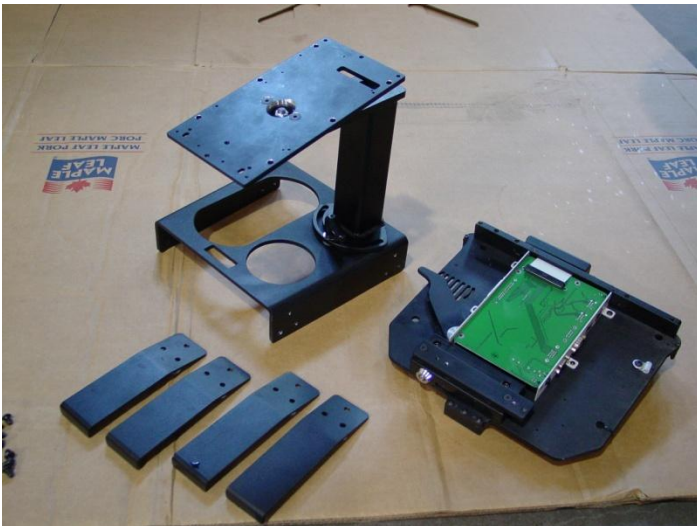

2008 Ford Explorer/Escape
OEM Console Laptop Mount

Note: Instructions based on Explorer, however the install process will be the same for the Ford Escape.

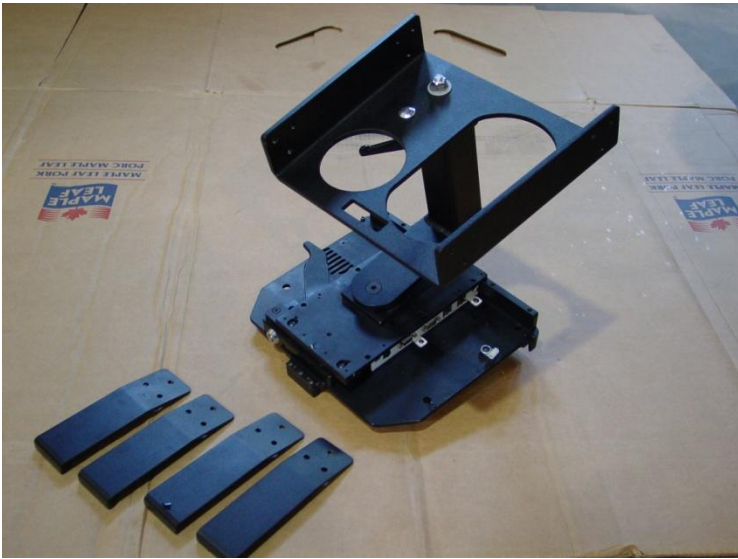

Part Layout:

1. Laptop docking station (Cf-30 shown)
2. 2008+ Ford Explorer OEM console mount base assembly
3. Mounting plate with tilt
4. 2008+ Ford Explorer OEM console mount anchor brackets (2x front, 2x rear)
5. Hardware

Step 1

Assemble mounting plate with tilt on to the console mount base assembly with appropriate hardware, as shown in the picture.

Step 2

Assemble the console mount now with mounting plate and tilt on to the bottom of the docking station using the appropriate hardware as shown.

Step 3

Place the assembly over the console as shown.

Step 4

Install the front anchor brackets to the assembly by first hooking the bottom flange underneath the OEM console, then using one allen key to pry the anchor up into position, fasten the bracket to the base assembly with the appropriate fastener. This will pull the unit tight to the OEM console providing a very secure mount. Repeat the procedure for the rear anchor brackets.

Step 5

The unit is now securely installed and ready for any final wiring and accessories that may be required.

2008+ Ford Explorer/Escape OEM Console Laptop Mount
with Panasonic CF-30
