DO NOT tighten completely until later in the installation.

## Step 4

Option 2, E-Brake module knock out

12v cigarettes lighter and USB module knock out

Knock off the cut-out on the side panel if the E-Brake module, 12v cigarettes lighter and USB module need to be re-located.

## Step 4 continued...

A. USB port module and 12v socket can be squeezed into the "knock-out" window.

B. Put the E-Brake module on, using suppled #10-24x0.5" screws to tight top two screws. And using #10-24x1.5" and #10 nyloc nut to secure the bottom screw.

A. Put the console on

## Step 5: Install Console and side bolts

B. Connect back all three cables (E-Brake, USB, and 12V Socket)

C. Push the console completely in, and make it aligned with the dash.

## Step 5: Install side bolts

-Install the side carriage bolts (supplied)that secure the console to the mounting brackets by sliding them down and holding with one hand, then use a plain washer, split lock washer, then the nut. Do not tighten until all bolts (12 in total) are installed and the position of the console is as desired.

## Step 5 Continued...

The console should line up with the dash as shown

Make sure all the mounting screws are tight and secured.

## Step 6: Install the rear cable cover

## Option 1:

Install the supplied rear cable cover, and using four #10-24x1/2" screws to tight it with the tunnel.

(shows below)

## Step 7

-Install the optionally supplied: armrest/cup-holder plate, blank filler plates, radio faces plates, and laptop mounting plates.

-The plates are secured to the console using the supplied 10-24 nuts that are slid into the console rails, and then fastened with the supplied  $10-24 \times 5/8''$  screws.

OEM 12v sockets re-installed

#### Tip:

PMT consoles use a "floating nut" style rail for attaching face plates to the console. In the consoles that have angled rails, foam inserts are used to help position the nuts for easier alignment with the face plates mounting screws. Use an allan key to position the foam and nut where desired, then mount the face plate. 12

## Step 8: Final adjustments

-Go over everything to make sure that everything is fully tightened and secure.

-Adjust positioning, and go over how the built in adjustments are used to maximize comfort, safety and functionality.
