

CLAMSHELL FOR GAMBER-JOHNSON UNIVERSAL USB-C DOCKING STATION

PMT's clamshell for Gamber-Johnson's Universal USB-C Docking Station folds down close to the top of the keyboard, creating a compact footprint similar to a laptop. Independent pivot and rotation of the display bracket allow flexible screen positioning to support a range of setups including either landscape or portrait device orientation. Built from CNC machined aluminum and finished in a black epoxy powder coat for exceptional durability and long-lasting performance.

FEATURES

- Rotation adjustment allows a quick and tool free change between landscape or portrait orientation
- CNC machined aircraft grade aluminum construction to ensure a lightweight, ultra-rugged solution in all mission critical operations
- Hinged mechanism allows angled adjustment toward the driver for improved visibility
- Upright position supports angle adjustment, with a forward lean of up to 105°
- Display bracket pivots and rotates independently from keyboard base for easy screen positioning
- Folds down to maintain access to dashboard components or vehicle controls
- Finished in black epoxy powder coat to provide years of durable, easy maintenance performance
- VESA 75mm hole pattern to allow multiple mounting options
- Supports multiple keyboard tray mounting options
- Limited Lifetime Warranty
