

## **TESTING SUMMARY**

## **Trimline Dock and Cradle for Dell 7230 Tablet Dock**

(AS7.D921.102 | AS7.D921.100 | AS7.D921.104 | AS7.D921.105|)

| Test Description                | Test Parameters  |
|---------------------------------|--|
| Vibration: Operational          | MIL-STD-810H, Method 514.6, Procedure 1  |
| Test date: Jan 2023             | Test duration is one 2-hour cycle along three mutually orthogonal axes – not   |
|                                 | simultaneously (6 hours total).  |
|                                 | Unit is unlocked.  |
| Vibration: Non-                 | MIL-STD-810H, Method 514.6, Procedure 1,   |
| Operational                     | Test duration is one hour along three mutually orthogonal axes – not   |
| Test date: Jan 2023             | simultaneously (3 hours total).  |
|                                 | Unit is unlocked   |
| Mechanical Shock                | MIL-STD-810G, Method 514.6, Procedure 1  |
| Safety: Non-Operational         | • 40G, 11ms half sine  |
| Test date: Sep 2021             | Unit is unlocked   |
| Cycle Test: Non-                | 30,000 cycles of the docking connector, latching and locking mechanisms  |
| Operational                     |  |
| Test date: Feb 2023             |  |
| Shock – Crash Hazard:           | SAE J1455, Section 4.11.3.5, per Figure 13   |
| Non-Operational                 | Unit is unlocked   |
| Test date: Nov 2022             | Unit is tested in front to back and side to side orientations  |
| EMC Testing                     | • FCC Part 15, Subpart B   |
| Test date: Dec 2022             | • ICES-003 Issue 7   |
|                                 | • CISPR 32/EN 55032:2012/AC:2013   |
|                                 | • EN 50498:2010  |
| Low Temperature:                | MIL-STD 810G: CHG1, Method 502.5, Procedure II   |
| Operational                     | • -20°C [14°F] Operational, 24 hours   |
| Test date: May 2022             |  |
| Low Temperature:                | MIL-STD 810G: CHG1, Method 502.5, Procedure I  |
| Storage                         | • -40°C [-40°F] Non-Operational, 24 hours  |
| Test date: Jan 2023             | MULCTD 040C; CUC4 Mark ad 504 5 December 1   |
| High Temperature:               | MIL-STD 810G: CHG1, Method 501.5, Procedure II   |
| Operational Test date: Jan 2023 | • 60°C [140°F], Operational, 24h per cycle, 5cycles  |
| High Temperature:               | MIL-STD 810G: CHG1, Method 501.6, Procedure I  |
| Storage                         | • 71°C [160°F] Non-Operational, 24h per cycle, 7cycles   |
| Test date: Jan 2023             | 2 /1 C[100 1] Non Operational, 2411 per cycle, 7 cycles  |
| Humidity                        | MIL-STD 810G Method 507.5, Procedure II, Aggravated, Figure 507.6-7  |
| Test date: Jan 2023             | • Ten 24-hour cycles, temperature varied from 30°C [86°F] to 60°C [140°F] to   |
|                                 | 30°C [86°F] at constant 95% relative humidity.   |
|                                 | and the state of t |
